

Table of contents

I. General Part of Criminalistics Theory

1. Concept and structure of criminalistics theory. Object, topic and subject of criminalistic cognition. System of universal and special methods of criminalistic cognition. Means of criminalistic cognition. Principles of criminalistic cognition. Structure of the process of criminalistic cognition.....7
2. Theoretical basis for criminalistic identification.....10
3. Theoretical basis for criminalistic diagnostics.....15
4. Theoretical basis for criminalistic classification.....18

II. Special Part of Criminalistics Theory

1. Theoretical basis for criminalistic technique:

1. Concept and system of criminalistic technique. Concept and structure of criminalistic technique theory. Cognition object, topic and subject of criminalistic technique. Cognition methods, means and principles of criminalistic technique. Concept and classification of means and modes of criminalistic technique.....20
2. Concept and system of criminalistic (legal) photography. Tasks of criminalistic photography. Concept and system of methods in criminalistic photography. Concept and system of ways of criminalistic photography. Concept and system of kinds of criminalistic photography. Concept and system of operational photography. Concept and system of research photography.....23
3. Concept and system of khabitology. Cognition object, topic and subjects of khabitology. Concept and classification of human's outward form's features. Basic kinds of description of human's outward form.....26

4. Concept and system of trasology. Tasks of trasology. Concept of objects in trasology. Concept of vestige in trasology. Elements of the process of forming vestiges. Concept of mechanism of forming vestiges. Cognition topic and subjects in trasology. Concept of khomoscopy. Concept of dactyloscopy. Concept of khomomechanoscopy. Concept of mechanoscopy. Concept of animal's vestiges..... 28
5. Concept and system of criminalistic doctrine about arms. Criminalistic doctrine about cold steel. Criminalistic doctrine about firearms. Criminalistic doctrine about explosive arms..... 35
6. Concept and system about criminalistic examination of documents. Concept of document. Technical examination of documents. Identifying the author of document..... 47
7. Concept and system of criminal recording. Objects, topic and subjects of criminal recording. Basics for criminal recording in Latvia. Classification of criminal recording..... 50
8. Concept of micrology, phonoscopy, genoscopy and odorology..... 53

2. Theoretical basis for criminalistic tactics:

1. Concept and system of criminalistic tactics. Cognition object, topic and subjects of criminalistic tactics. Concept and system of investigatory activity. Concept and kinds of investigatory situations. Concept and types of tactical mode. Concepts of tactical combination and tactical operation. Cognition means and principles of criminalistic tactics..... 54
2. Theoretical basis for examination tactics. Concept and types of examination. Peculiarities of basic stages of examination. Principles of carrying out examination. Concept of inspection. Peculiarities of fixing the results of examination and inspection..... 58
3. Theoretical basis for interrogation (questioning) tactics. Concept and types of interrogation (questioning). Topic of interrogation (questioning). Classification of tactical modes of interrogation (questioning). Peculiarities of basic stages of interrogation (questioning). Concept of confrontation. Peculiarities of fixing the results of interrogation (questioning) and confrontation..... 61
4. Theoretical basis for onsite testimony verification tactics. Concept of onsite testimony verification. Peculiarities of basic stages of onsite testimony verification. Classification of tactical modes of onsite testimony verification. Peculiarities of fixing the results of onsite testimony verification..... 69

5. Theoretical basis for investigatory experiment tactics. Concept of investigatory experiment. Aims of carrying out investigatory experiment. Peculiarities of basic stages of investigatory experiment. Peculiarities of fixing the results of investigatory experiment..... 72
6. Theoretical basis for search tactics. Concept and types of search. Peculiarities of group-type search. Participants of search. Peculiarities of basic stages of search. Classification of tactical modes used during inspecting search place. Concept of seizure. Peculiarities of fixing the results of search and seizure..... 75
7. Theoretical basis for presentation for identification. Concept and types of presentation for identification. Objects, topic and subjects of presentation for identification. Peculiarities of basic stages of presentation for identification. Peculiarities of fixing the results of presentation for identification..... 81
8. Theoretical basis for forensic examination. Concept and types of forensic examination. Objects, topic and subjects of forensic examination. Concept and types of criminalistic examination. Factual base for determining forensic examination. Legal base for carrying out forensic examination. Basics for evaluation of forensic examination conclusion. System of forensic expert institutions in Latvia.....87

3. Theoretical basis for criminalistic methodics:

1. Concept and system of criminalistic methodics. Cognition object, topic and subjects in criminalistic methodics..... 95
2. Concept and types of criminal offences' investigation planning. Structure of criminal offences' investigation planning. Elements of carrying out separate investigatory activity..... 96
3. Concept and classification of investigative version. Basis for building up versions and modes of checking-up versions. Concept and forms of cooperation for person forwarding pre-trial procedure..... 98
4. Cognition methods, means and principles of criminalistic methodics..... 99
5. Content of special part in criminalistic methodics. Elements of investigatory methodic's structure for separate kinds of criminal offences. Forms of cooperation between person forwarding procedure and society..... 100
