An economic program to renew Latvian development.....	46

The Social and Economic Logic of Taxing Land Values, Not Labour or Capital

<i>Terry Dwyer</i>	51
Summary of Economic Arguments for Land Value Taxation	51
The simple logic.....	54
Point One	54
Point Two.....	54
The importance of taxation	55
The moral arguments for land value taxation.....	57
The Economic Arguments for Land Value Taxation	59
Tax Incidence Theory.....	61
Income and consumption are not final tax bases	61
Only a tax on economic rent is a true non-distorting lump sum tax.....	62
A land value tax cannot avoided or shifted and is capitalized	63
A land value tax cannot be shifted to lessees in the long run.....	64
A land value tax has an effective marginal tax rate of zero.....	66

Short and long run effects of shifting to a land value tax	66
International tax competition means one should tax an immobile base	67
Who ultimately bears a land value tax?	68
A new land value tax in isolation	68
When other taxes are cut, a new land value tax can even benefit landholders	69
Shifting from transfer taxes to land value taxation	69
Which taxes should be cut to produce the best dividends?	70
Land values reflect external benefits and a land value tax captures these	71
Land value taxation deters harmful speculation and real estate bubbles	73
Land value taxation may promote healthy decentralization	74
Land value taxation promotes free and fair competition	75
Land value taxation and infrastructure charges	75
Land value taxation theory in summary	77
Land value taxation - practical issues	77
The Rate Scale	77
Should there be any exemptions?	78
Revenue adequacy	79
Revenue stability	79
Making a land value tax convenient for taxpayers	79
Tax credits against income and social security taxes	80
Valuations	81
Depletable resources	83
Revenue sharing	83
The virtues of land value taxation may partly account for some unpopularity	84
Conclusion	85
